EUROFLIR™ 350
LONG-RANGE ELECTRO-OPTICAL SYSTEM

• Compact & lightweight system
• Long-range observation, day/night
• Accurate targeting
• Combat proven

SAFRAN
Safran Electronics & Defense proposes the dual use Euroflir™ 350 to meet users’ evolving mission requirements: law enforcement, homeland security, border & coastal surveillance, intelligence, SAR & CSAR, Special Forces operations.

The Euroflir™ family capitalizes on Safran Electronics & Defense’s 35 years of experience in developing high-performance airborne electro-optical systems. The combat-proven Euroflir™ 350 is already used on many French Army and other nations’ rotary-wings deployed in today’s most demanding theaters.

The Euroflir™ 350 provides long-range observation and targeting capabilities enabling unsurpassed image quality thanks to advanced local image processing within a compact and lightweight system.

**EUROFLIR™ 350**

**Long-range electro-optical system**

---

**LONG RANGE OBSERVATION**

Wide field-of-view & long-range observation

- **Resolution:** 1920 x 1080
- **FOVs:** 24° up to 1.3°
- **Type:** continuous zoom

**ACCURATE TARGETING**

Precise target geolocation & pointing thanks to advanced laser functions

- **Wavelength:** 830 nm
- **Eye safety:** 3B class
- **Range:** up to 20 km
- **Eye safety:** 1M class

---

**COMBAT PROVEN**

Deployed in today’s most demanding theaters all over the world

- **CASA C-212**
- **Diamond Aircraft Industries DA42 Twin Star**
- **Airbus Helicopters H25M Fennec A5530 Ecureuil A5532 Cougar H225M Caracal**
- **Safran Electronics & Defense Sperwer Patroller**
- **A-NSE T C350**
