SUNTSU

Battle Management App

Sagem drew on its vast experience with soldier modernization programs to develop SUNTSU, the most advanced battle management application now on the market for mobile devices.

SUNTSU runs on smartphones, tablets or any other Android-based device, and is as effective as a traditional battle management system. It also allows you to use any network connected to your device, including 3G or 4G mobile phone networks, or a mobile ad hoc network (MANET).

All members of your battle group with the SUNTSU app can easily locate each other, and send and receive orders or tactical information, quickly and securely.

SUNTSU is also compatible with the usual computer map formats.

- Easy to use
- Easy to deploy
- Easy to manage

Capabilities:

> Tactical situation analysis

The map view allows users to see blue force and other tactical information (APP6/NATO symbols) from other SUNTSU users.

> Orders/Messages

SUNTSU supports the sending and receiving of formatted orders or unformatted text messages.

> Alert Message

The alert message window is used to send emergency messages to other SUNTSU users, such as strike alerts or enemy contact.

> Map analysis

SUNTSU includes a number of powerful tools to assess geographic situations, such as intervisibility analysis.

> Order of battle management

By simply registering all SUNTSU users, you create a secure community, ready to meet the challenges of the battlefield.

> Multimedia

SUNTSU includes a multimedia library allowing users to manage and share photos and videos.

Mobile Network 3G – 4G compatible
